

How to Store Your Soil

QUICK TIPS TO GET THE MOST OUT OF YOUR INVESTMENT

When possible, store bagged products out of direct sunlight, which can degrade the woven polypropylene bags and dry out the soil. If storing outside, use a tarp or store along the north side of a building (but not under a drip edge).

To help maintain proper moisture, **protect bags from precipitation and from drying out. Tightly tie sling bags shut while not actively using them.**

The biota in our living soils survive freezing, **so you can store your soil outside or in an unheated building through the winter.** Remember that your soil might take up to a few days to defrost. Storing in a heated building or greenhouse can dry out the product, so only move soil into heated spaces as you plan to use it. **Excess heat can cause nitrifying bacteria to rapidly deplete oxygen, which will create anaerobic conditions, limiting nutrient availability.**

Our soils are alive with aerobic microorganisms, which need oxygen to thrive. **As you use soil from sling bags or bulk piles, mix the remaining soil to reintroduce oxygen.**

Be conscious about keeping potential contaminants away from your soil. Protect your soil from road salt during winter transport. To prevent rodents from burrowing into your soil and introducing seeds, store soil in closed containers, set traps, and employ barn cats and dogs.

Storage time is a function of all other storage conditions. **For optimal performance, we generally recommend a maximum storage period of about 9 months.** After this time, please conduct a germination trial before investing a full seeding in the soil.

2025—2026 Wholesale Prebuy Details

Early Bird

Save 20% off wholesale.

Order, pay, and take delivery or pickup by October 31st.

20%
off

Late Fall

Save 15% off wholesale.

Order, pay, and take delivery or pickup between November 3rd and December 19th.

15%
off

Flexible

Save 10% off wholesale.

Order and pay for the product by December 19th. Then, pay for shipping and take delivery or pickup before June 30th.

10%
off

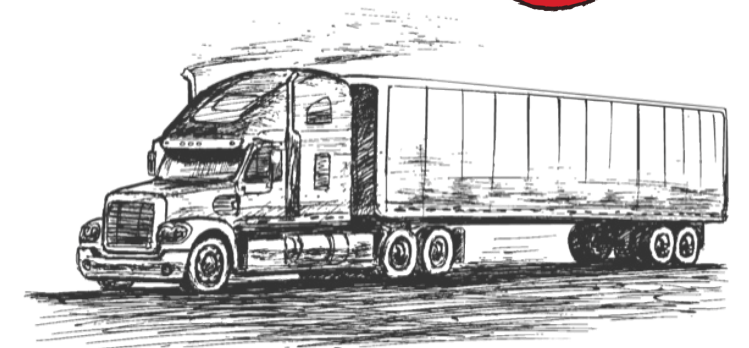

FULL TRUCKLOAD (20–24 pallets/slides delivered to one address)

Save 20% off wholesale

Order and pay for your soil/compost by December 19th.
Schedule your order to ship before January 30th.
Shipping rates will be calculated within 2 weeks of your ship date and must be paid before your order ships.

PREBUY TERMS

- All Prebuy orders must be paid for **before** picking up or shipping.
- Orders are scheduled and shipped first come, first served. Pickups must be scheduled in advance.
- Please submit your order as soon as you are able. Turnaround times can be long during our busiest season, and inclement winter weather may delay your delivery.
- After December 21st, wholesale pricing will be in effect for all new orders.
- All pricing is subject to change.
- Listed prices include discount. Prices are Freight on Board from our Montpelier site. Each pallet contains approximately 2 cubic yards of soil.

Ordering is simple!

Fort Vee

All Purpose Compost-Based Potting Mix

Our flagship soil, Fort Vee is a complete germinating and growing-on mix designed for soil blocking that is also excellent for trays, pots, and containers. This living soil provides balanced nutrition and exceptional texture to grow vibrant, sturdy transplants.

Fort Light

Lightweight Compost-Based Potting Mix

This potting soil has all the benefits of a compost-based mix plus additional drainage. A complete germinating and growing-on mix, Fort Light is particularly desirable for growers using smaller celled plastic flats or where lighter weight is preferred.

Compost Plus

Container & Transplant Booster Mix

Packed full of nutrients, minerals, organic matter, and soil life, Compost Plus can replace liquid or granular fertilizer in your soil health program. Diverse microbes quickly make nutrients available, feeding the soil to nourish your plants. Compost Plus can be applied at transplant, as a topdress, or to reinvigorate tired soils.

Jolly Roger

Flowering & Fruiting Container Mix

Jolly Roger is specifically crafted for container cultivation of plants with high nutrient needs, including tomatoes, cannabis, and hemp. Transplant into Jolly Roger once plants are fully established, and prepare to be impressed by a vigorous vegetative phase and bountiful yield.

Perennial Blend

Large Container & Raised Bed Mix

Coarser than Fort Vee or Fort Light, Perennial Blend is formulated for filling raised beds and large containers. It mimics naturally fertile garden soil and is particularly suitable for woody plants, shrubs and herbs, and also performs well in vegetable and flower beds.

| Perennial Blend | | Early Bird | Late Fall | Flexible | Full Truckload | Wholesale |
|-----------------|--------------|------------|-----------|----------|----------------|-----------|

Manure Compost

Living Soil Amendment

This mature compost blend is the basis of all the soil mixes we make. Carefully crafted for field and greenhouse applications, manure compost increases organic matter, soil tilth, and nutrition. Like all our products, manure compost is tested for maturity and is free of live weed seeds. Manure Compost is screened to 3/4" or less to ensure a consistent, refined product.
